

RECYCLED LDPE RESINS

RECYCLED LDPE RESINS

European countries put more and more effort into using more recyclables. Some have already decided to make it mandatory as a means to drive a circularity. We are proud that our dedication to manufacturing high-quality recyclates has been recognized by the EuCertPlast.

We offer high-quality LDPE recycled plastic resin for the manufacturing of film products. The application of our technologies allows us to provide you with the highest quality PCW (post-consumer waste) recyclate while generating a 10x smaller CO₂ footprint than in the case of production with virgin plastics. Processed plastic resin is environmentally friendly, durable, chemically stable, and suitable for producing even a thin film.

TRANSPARENT, TRANSLUCENT

Recyclate made from PCW transparent films.

Product specifications

Material: LD-PE (Low-density Polyethylene)

Technical specifications

Density – $0,92 \pm 0,02$ g/cm³

MFR(190 oC/2,16 kg) – 0,6 - 2.0

BLACK

Recyclate, made from PCW films, such as agricultural plastic films.

Product specifications

Material: LD-PE (Low-density Polyethylene)

Technical specifications

Density – $0,92 \pm 0,02$ g/cm³

MFR(190 oC/2,16 kg) – 0,6 - 2.0

MIXED COLOR (JAZZ)

Recyclate, made from PCW mixed-color plastic films.

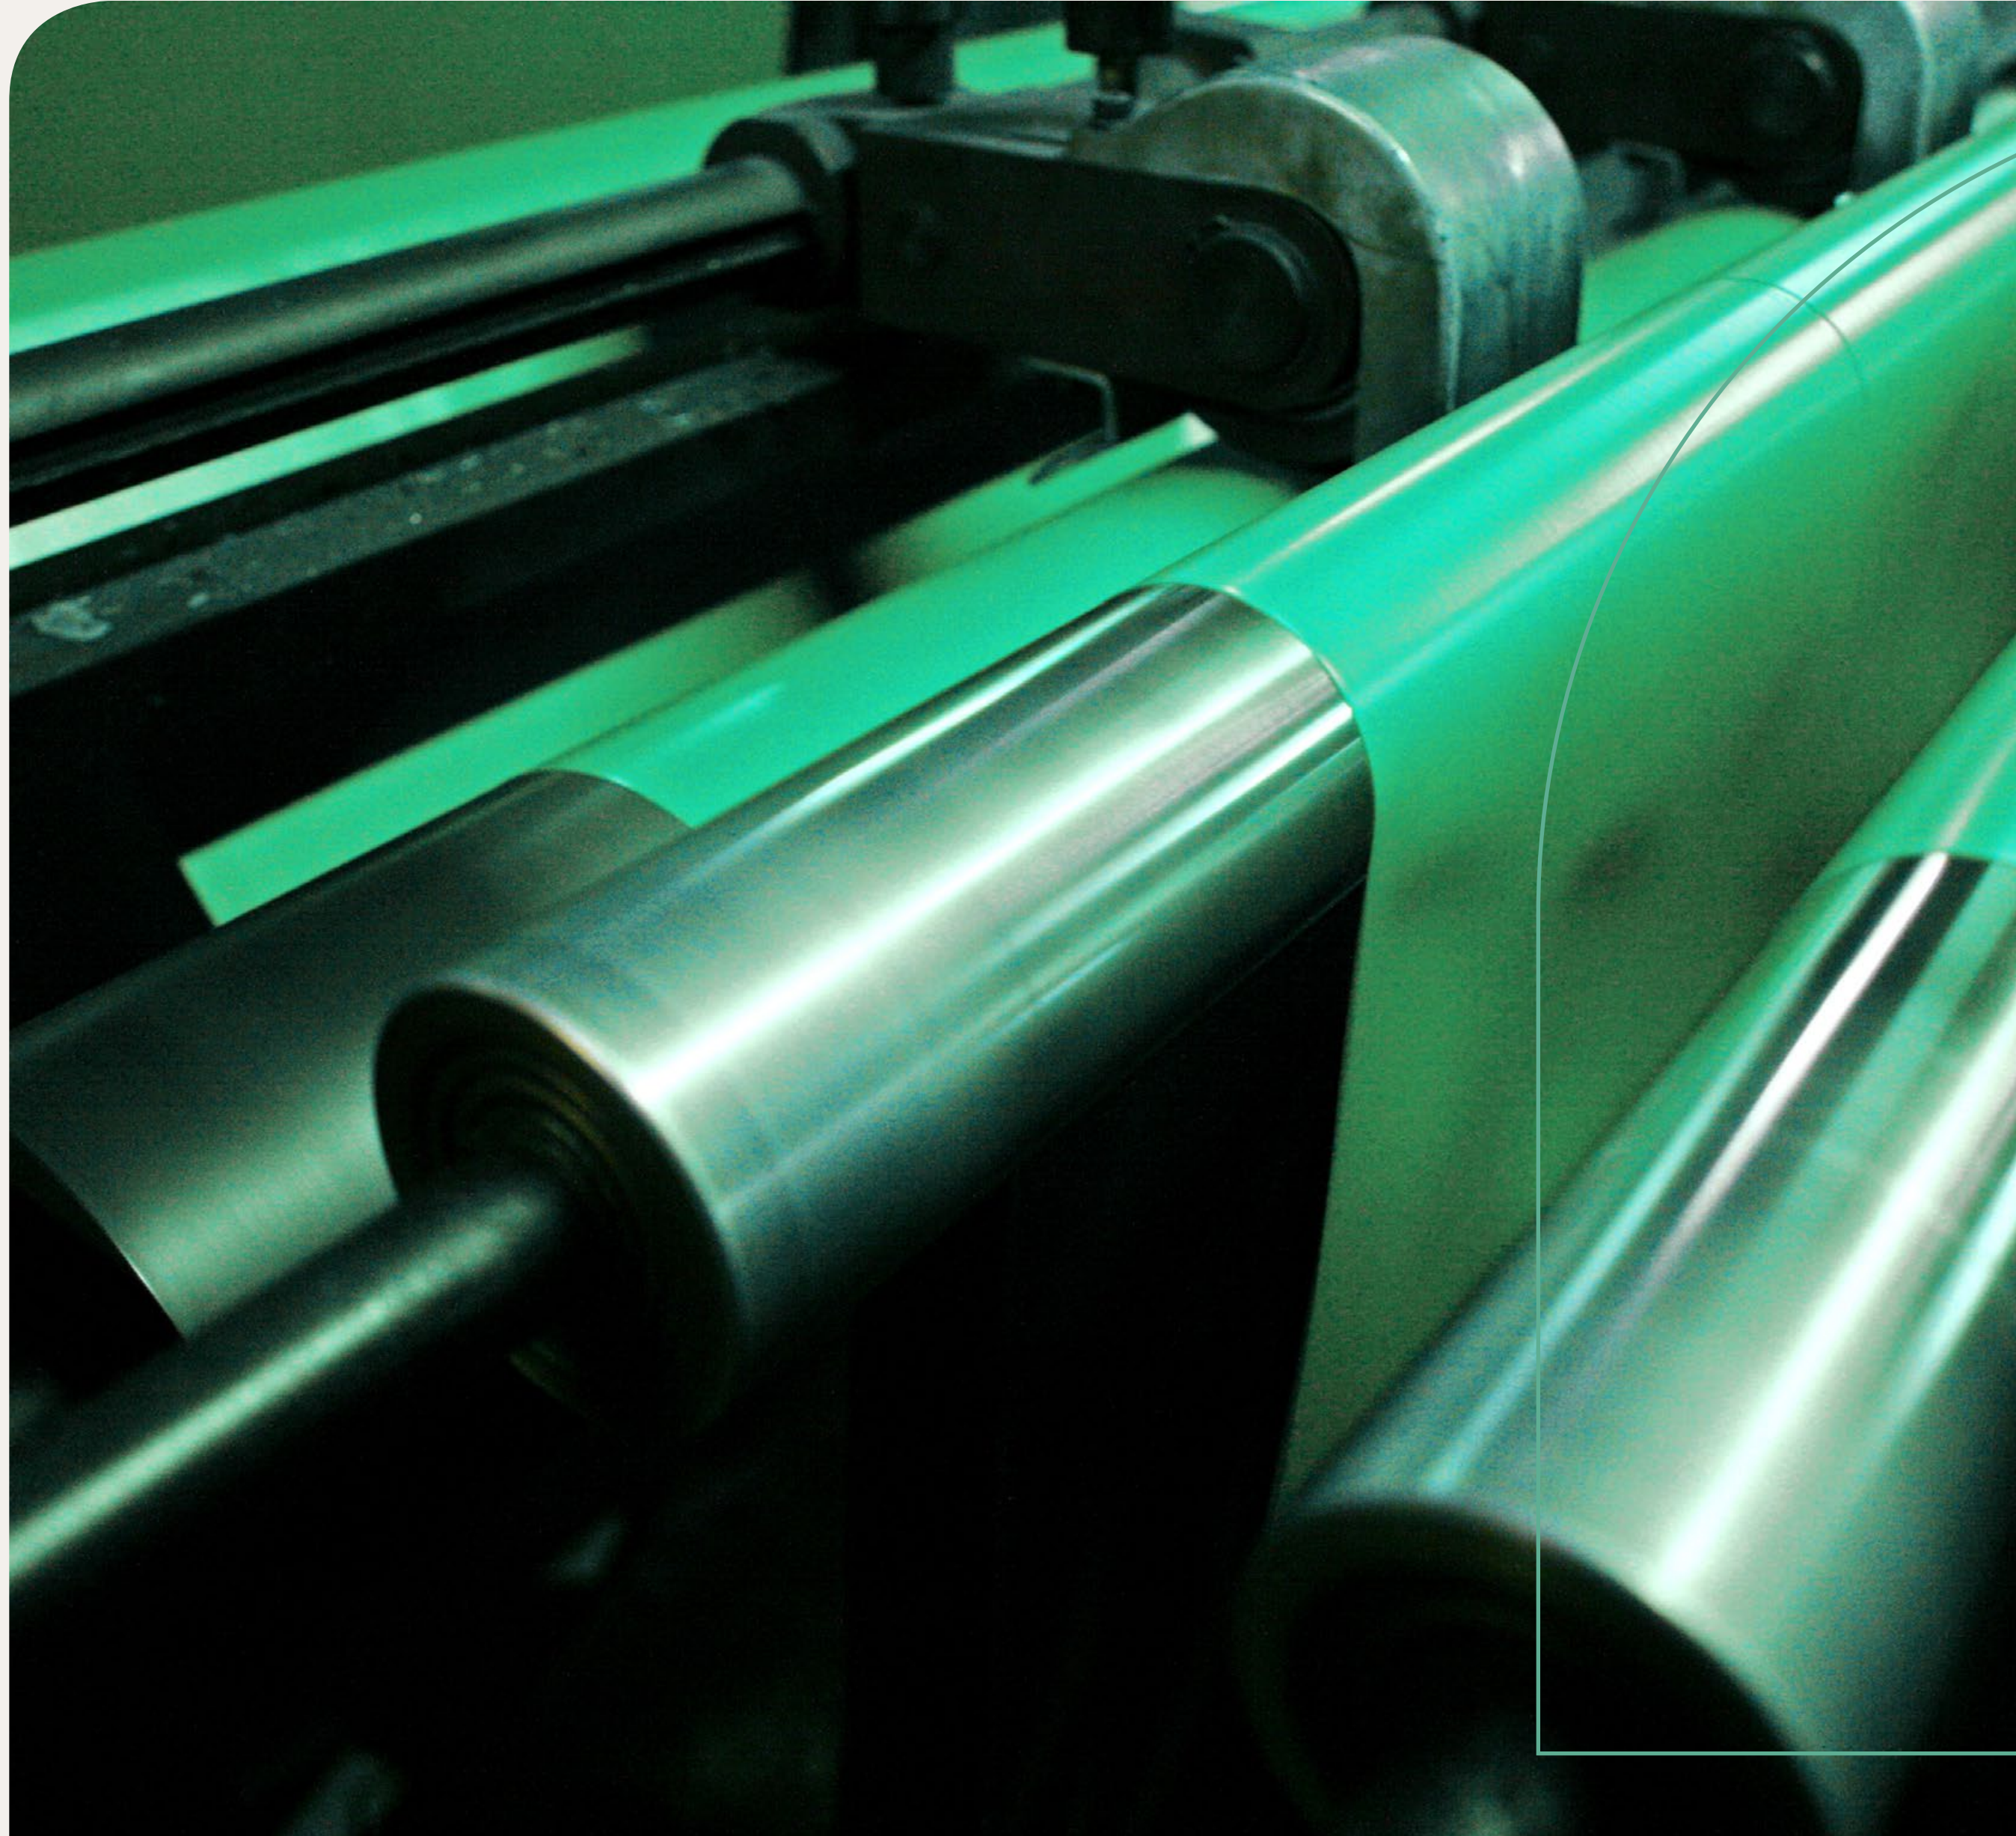

Product specifications

Material: LD-PE (Low-density Polyethylene)

Technical specifications

Density – $0,92 \pm 0,02$ g/cm³

MFR(190 oC/2,16 kg) – 0,6 - 2.0
